The English Shepherd Pedigree Project List of PennHIP'd Dogs

This is a list of some English Shepherds that have been certified by PennHIP. Where a pedigree is available online you can clic on the dog's name and get their pedigree.

This is not a complete list. PennHIP information is not publically available (passing scores for OFA are). The following info is shared with the permission of the dog's owner. I want to applaud them for this!!!

As of June 2007, 118 English Shepherds have been reviewed by PennHIP with a median of 0.50 for the breed.

Where a PennHIP scores states "unrated" it was because the xray could not be properly read due to a mistake on the part of the Vet in taking the xray, it has nothing to do with the quality of the hip in question. DJD means degenerative joint disease is evident, this might be due to CHD or an accident.
